**RE: Please Protect Endangered Species
Support the Recovering America's Wildlife Act of 2023 (S.1149)**

Dear Senators,

As a person of faith and your constituent, I believe in caring for all of God's creation. Currently, there are 1,480 species listed under the Endangered Species Act and now more than ever, it is crucial that we work to conserve wildlife and biodiversity. We can help critically endangered species recover and prevent them from going extinct.

I urge you to support the Recovering America's Wildlife Act of 2023 (S.1149). This bill is an important step in providing the necessary resources to protect wildlife all over the United States and its territories. I ask you to cosponsor this bill to help endangered species.

Thank you for your consideration,
